Career Objective

Aspiring AI-powered cybersecurity engineer with a focus on offensive security and secure application development. Currently pursuing a bachelor's degree in the UK, with a strong foundation in software engineering and AI technologies. Actively seeking internships to apply skills in real-world cybersecurity challenges.

Experience

Independent Cybersecurity & Software Development P

Self-Employed (Personal Projects) | November 2025 - Current

- Designed and developed **YushaCyber**, a full-stack cybersecurity learning platform featuring secure authentication, AI mentor integration, XP-based progression, learning roadmaps, and interactive challenges.
- Built **AURA**, an offline AI assistant with voice interaction, gesture recognition, facial emotion detection, and local AI model integration.
- Developed an AI-powered gaming assistant using Python, OpenCV, and MediaPipe for real-time gesture recognition and automation.
- Gained practical experience with Python, Flask, SQLAlchemy, SQLite, Git, GitHub, Linux, and cybersecurity tools through hands-on projects.
- Applied secure coding practices, database design, debugging, version control, and problem-solving while developing real-world applications.
- Continuously expanded knowledge of networking, web security, and offensive security concepts through practical labs and self-directed learning.

Skills

- Python
 - C
 - HTML
 - CSS
 - Basic JavaScript
 - Flask
 - SQLAlchemy
 - SQLite
 - Linux
 - Kali Linux
 - Nmap
 - Wireshark
 - Burp Suite
 - OWASP Top 10
 - Networking Fundamentals
 - OpenCV
 - MediaPipe
 - TensorFlow
 - DeepFace
 - Speech Recognition
 - Git
 - GitHub
 - VirtualBox
 - VS Code
-

Education

Higher Secondary Education (+2)

Reliance International Academy | Nepal | 01/2083

GPA: 3.57 / 4.00

Languages

English:

Nepali:

Custom

- YushaCyber, Full-stack cybersecurity learning platform with authentication, XP system, AI mentor, learning roadmaps, and CTF functionality.
 - AURA AI Assistant, Offline AI assistant with voice commands, gesture recognition, emotion detection, and local LLM integration.
 - AI Gaming Assistant, Computer vision based gesture-controlled gaming assistant.
-

Interests

- Cybersecurity Research
- AI & Machine Learning
- Ethical Hacking Labs
- Python Programming

- Building Software Projects
 - Open-Source Development
 - Learning Emerging Technologies
 - Network Security
 - Problem Solving
 - Technical Blogging (if you start writing)
-

Driving licence

- Full Motorcycle Driving Licence (Nepal)
